Module Aims, Learning Outcomes and Indicative Contents	
أهداف المادة الدراسية ونتائج التعلم والمحتويات الإرشادية	
Module Objectives أهداف المادة الدراسية	This course has been designed to help learners to understand the core concepts and applications of Data Science and Familiarize them with essential data manipulation and visualization techniques. Various data sources and collection methods will be explored in this course to enable learners develop skills in data cleaning and preprocessing. It is anticipated that learners, at the end of this course, will be able to effectively communicate data insights and build data narratives by creating reports and visualizations for data communication.
Module Learning Outcomes مخرجات التعلم للمادة الدراسية	Upon completion of this course, learners will be able to: 1. Data Acquisition & Ingestion: Programmatically retrieve data from diverse sources including SQL databases, NoSQL stores, web APIs, and unstructured files. 2. Advanced Data Wrangling: Perform complex data transformations, feature engineering, and handling of missing or biased data using professional libraries (e.g., Pandas, Polars). 3. Statistical Inference: Apply p-values, confidence intervals, and Bayesian logic to determine the significance of observed data trends. 4. Exploratory Analysis (EDA): Identify hidden correlations and multivariate relationships using statistical summaries and diagnostic plotting. 5. Supervised Learning: Build and optimize regression and classification pipelines using frameworks like Scikit-Learn to predict continuous and categorical outcomes. 6. Unsupervised Learning: Implement clustering and dimensionality reduction techniques (e.g., K-Means, PCA) to discover latent structures in unlabeled data. 7. Model Evaluation & Tuning: Quantify model performance using metrics like RMSE, F1-Score, and ROC-AUC, while refining models through hyperparameter optimization. 8. Data Visualization & Dashboarding: Design compelling, interactive dashboards using tools like Tableau, Power BI, or Polly to communicate complex narratives. 9. Data Ethics & Privacy: Navigate the legal and ethical landscape of data science, focusing on GDPR compliance, algorithmic fairness, and data anonymization. 10. Scientific Communication: Translate technical findings into concise executive summaries and oral presentations tailored for diverse business audiences. 11. Professional Portfolio (Capstone): Manage a full-scale data science project from problem definition to deployment, showcasing a mastery of the end-to-end data lifecycle.
Indicative Contents المحتويات الإرشادية	• Definition and scope of Data Science. • Data preprocessing: encoding, scaling, and normalization. • Data cleaning techniques: handling missing data, data formatting. • Descriptive statistics: mean, median, variance, skewness. • Exploratory data analysis techniques: box plots, scatter plots, histograms.

	- Correlation Analysis, Analysis of variance, and non-parametric statistical tests. - Time series data exploration. - Data extraction and manipulation using SQL. - Data wrangling techniques: filtering, merging, pivoting - Ethical considerations in data collection and analysis. - Building data narratives and reports. - Applying data science skills to a real-world project.

Grading Scheme					مخطط الدرجات
Group	Grade	التقدير	Marks %	Definition	
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance	
	B - Very Good	جيد جدا	80 - 89	Above average with some errors	
	C - Good	جيد	70 - 79	Sound work with notable errors

	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria	
Fail Group (0 – 49)	FX – Fail	راسب (قيد المعالجة)	(45-49)	More work required but credit awarded	
	F – Fail	راسب	(0-44)	Considerable amount of work required	

Note: Marks Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.
