Course Objectives</b>                                                                                                                                                                                                                                                                                                             |
| <b>Course Objectives:</b> <ul style="list-style-type: none"><li>• Provide general knowledge regarding the most common illnesses in our department.</li><li>• Train our students on how to deal with our patient in the ER and/or outpatient setting.</li><li>• Teach them the necessary skills needed during their residency.</li></ul> |

## 9. Teaching and Learning Strategies

### Strategy:

Exposure to topics in Otolaryngology ensues in the fifth year of medical school. This includes didactic lectures, interactive group sessions, case-based tutorials, and hands-on clinical skills training in the teaching hospital.

## 10. Course Structure

|      |       | 10.Course Structure                                                      |                              |                 |                                                                                                                                                                                                                                                                                                                                                                                                        |

| Week | Hours | Required Learning Outcomes                                               | Unit or subject name         | Learning method | Evaluation method                                                                                                                                                                                                                                                                                                                                                                                      |
| 1    | 1     | Review about the anatomy and physiology of the ear                       | Anatomy of the ear           | Lecture         | Evaluation consists of biweekly assessment in the hospital for each small group during their two-week rotation in the ENT department at Al-Hindiya Teaching Hospital. It also involves random quizzes during the first five minutes of some lectures. In addition to the aforementioned methods of assessment, we administer a mid-course exam as well as end of course exam at the end of the course. |
| 2    | 2     | Learn about external ear infections                                      | Otitis externa               | Lecture         |                                                                                                                                                                                                                                                                                                                                                                                                        |

| 11   | 1     | Learn about vertigo & tinnitus, its causes and the management            | Vertigo & Tinnitus           | Lecture         |                                                                                                                                                                                                                                                                                                                                                                                                        |

|    |   |                                                           |                                                        |         |
|----|---|-----------------------------------------------------------|--------------------------------------------------------|---------|
| 12 | 1 | Review about the anatomy of the pharynx and larynx        | Anatomy of the upper airway                            | Lecture |
| 13 | 2 | Learn about throat infections                             | Pharyngotonsillitis                                    | Lecture |
| 14 |   |                                                           |                                                        |         |
| 15 | 1 | Learn about the commonest types of pharyngeal tumors      | Pharyngeal tumors                                      | Lecture |
| 16 | 1 | Learn about common causes of acute and chronic laryngitis | Acute and chronic inflammations of the larynx          | Lecture |
| 17 | 2 | Introduction to airway obstruction, and its management    | Airway Obstruction, cricothyroidotomy, and tracheotomy | Lecture |
| 18 | 1 | Learn about benign laryngeal lesions                      | Benign Laryngeal Lesion                                | Lecture |
| 19 | 1 | Learn about malignant laryngeal lesions                   | Malignant Laryngeal Lesions                            | Lecture |
| 20 | 1 | Review about the anatomy of the nose and nasal cavity     | Anatomy of the Nose                                    | Lecture |
| 21 | 1 | Learn about the pathogenesis, diagnosis, and treatment    | Allergic Rhinitis                                      | Lecture |
| 22 | 2 | Learn about infection of the nose and paranasal sinuses   | Rhinosinusitis                                         | Lecture |
| 23 |   |                                                           |                                                        |         |
| 24 | 2 | Learn about facial trauma including septal perforation    | Facial Trauma                                          | Lecture |
| 25 |   |                                                           |                                                        |         |
| 26 | 1 | Learn about causes and                                    | CSF Rhinorrhea                                         | Lecture |

|    |   |                                                                        |                                                 |                |  |
|----|---|------------------------------------------------------------------------|-------------------------------------------------|----------------|--|
|    |   | <b>treatment of CSF rhinorrhea</b>                                     |                                                 |                |  |
| 27 | 2 | <b>Learn about causes and management of nose bleeds</b>                | <b>Epistaxis</b>                                | <b>Lecture</b> |  |
| 28 |   |                                                                        |                                                 |                |  |
| 29 | 1 | <b>Learn about the tumors of the nasal cavity</b>                      | <b>Tumors of the nose and paranasal sinuses</b> | <b>Lecture</b> |  |
| 30 | 1 | <b>Learn about different less common conditions affecting the nose</b> | <b>Miscellaneous conditions of the nose</b>     | <b>Lecture</b> |  |

### 11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports .... etc.

### 12. Learning and Teaching Resources

|                                                                                         |                                                                        |
