### **AMIN ALTAWWASH**

*Date of birth:* 1979. – live in Kerbala.

#### **EXPERIENCE**

- Work for five years in oil refinery in installing, operating and maintaining in many units like Compressors, steam turbines, Heat exchangers and pumps.
- Work for seven years in water purification stations; designing, installing, operating and maintaining.
- Work for five years in workshop for vehicles and small cares (diesels and benzene; maintains and diagnoses using diagnoses tools.
- Work for two years with inspection engineering team for safety, installing and maintains using experience and inspection tools.
- Take part in many technical training course for installing and maintain turning machines.
- Take part in many management training course like leadership, TOT, project management, risk management, HR, and feasibility study

#### **Education:**

- M.Sc. in mechanical engineering / power and fluid.
- My theses topic was “Study Performance Improvement of Car Air Conditioning System Using Alternative Refrigerants”.
- Published two papers for refrigerants and environment impact, “Investigating Experimentally a Friendly Alternative Refrigerant for R134a in Automotive Air Conditioning System” and “Investigate theoretically a Friendly Alternative Refrigerant for Automotive Air Conditioning System.
- Speak Arabic, English, and using computer and internet.
- I gave many lectures for engineers in Engineering Syndicate.

#### **Leadership:**

I have leadership skills in management technical team for operation and maintains. I have experience in providing guidance and support to staff, analysis problems and break down them for fixing, setting performance expectations and providing feedback.
