

Nursing College

Graduated students description

At the end of the Bachelor of Science in Nursing program, a graduating student will be able to:

- 1. Provide patient-centered care that is based on the values, beliefs, and specific needs of patients within the context of their families, communities, and the healthcare delivery system.**
- 2. Demonstrate professional behaviors in the practice of nursing. The following concepts are taken into account for the graduating student: professional values (ethical and legal practice and patient advocacy).**
- 3. Demonstrate the integration of knowledge, skills, and professional attitudes through the use of clinical evidence and reasoning.**
- 4. Identify safety and security risks and develop strategies to reduce the risk of harm to individuals and populations.**

Key Skills and Qualities of a Nursing Graduate:

- Patient-centered care: Graduates prioritize the individual needs and preferences of their patients, taking into account their unique circumstances and backgrounds.**
- Professionalism: Graduates adhere to ethical and legal standards, act with integrity, and advocate for their patients' well-being.**
- Critical thinking: Graduates use evidence-based practices and clinical reasoning to make informed decisions about patient care.**
- Safety consciousness: Graduates are vigilant about identifying and mitigating potential risks to patient safety.**
